25 Sept 2023

Highly motivated to work with Tech Companies. I have been developing Apps using Flutter from Last 2 years, My interest lead me to learn new technology without feeling the burden of any work. I am an avid learner as well as an enthusiast who can work tirelessly through the day. I keep up with the latest updates in flutter and frameworks quite frequently. I am passionate about mobile App development and learn from my experiences. I'm well experienced with using Firebase Database as a backend solution. I am also learning backend and created an RESTful API using expressJS.

Yours Sincerely,

*Abishek Kishore*
